

PTCA REPORT

Consultant: Dr. Santhosh Narayanan MD, DNB, DM (Cardiology)

Name: SHAMSUDEEN	Age: 55Y	Sex: M
CATH NO: 24991	IP No:607662	Date: 31-08-26
CATH TECH : MALHAR		Scrub nurse: MUSINA

Premedication : Nil

Vascular Access : RRA

Target Vessel/lesions : OM₁ (90%) and LAD (90%)

Inventory : PTCA ☐ OM₁

Sheath : 6F Radifocus terumo

Guiding Catheter : 6F EBU 3.5

Guide wire : 0.014" Runthrough floppy

Pre dilatation balloon : 2.0X10 Ryurei @ 10,12,14 atm

Stent : 2.5x16 Adv Pro @ 10atm(2.52)

Post dilatation balloon : 2.5x12 Accuforce NC @ 14,14 atm

Inventory : PTCA ☐ LAD

Guide wire : 0.014" Runthrough floppy

Pre dilatation balloon : 2.0X10 Ryurei @ 14,14,12 atm

2.5x16 stent balloon at 14,16 atm

Stent : 2.75x28 teriflex @ 10atm (2.78)

Post dilatation balloon : 2.75x12 Accuforce NC @ 14,16,14,18 atm

Result : Good
Complications : Nil
Adjuvants : Heparin 7000 units
Contrast : 100 ml Omnipaque
Hemodynamic Data : Aortic: Pre PTCA: 160/80 mm Hg

PROCEDURE:

Patient was taken up for PTCA with informed consent, RRA access was taken LCA was cannulated with a 6F EBU 3.5 guiding Catheter. And the OM1 lesion was crossed with a 0.014" Runthrough floppy guide wire and the lesion was predilated with a 2.0X10 mm Ryurei balloon at 10,12,14atm. Later a **2.5x16mm Adva pro** stent was deployed to the Proximal OM at 10atm to a size of 2.52 mm. The proximal, mid, distal part of the stent was post dilated with a 2.5x12 mm Accuforce balloon at 14,14atm.

And the LAD lesion was crossed with a 0.014" Runthrough floppy guide wire and the lesion was predilated with a 2.0x10 mm Ryurei balloon at 14,14,12atm and 2.5x16 balloon at 14,16 atm. Later a **2.75x28mm Tetriflex** stent was deployed to the Ostial to proximal at 10atm to a size of 2.78mm. The proximal, mid, distal part of the stent was post dilated with a 2.75x12mm Accuforce NC balloon at 14,16,14,18atm. Check shoots revealed well deployed stent with no residual stenosis, no thrombus, no dissection with good vessel flow distally. There was no procedure related complications.

COMMENT: PTCA WITH STENTING OF OM₁ (1DES), LAD(1DES) DONE SUCCESSFULLY
